Possible Solutions
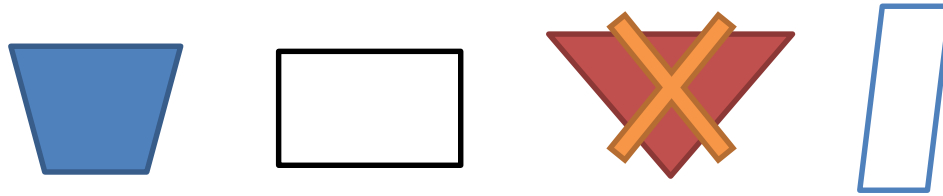

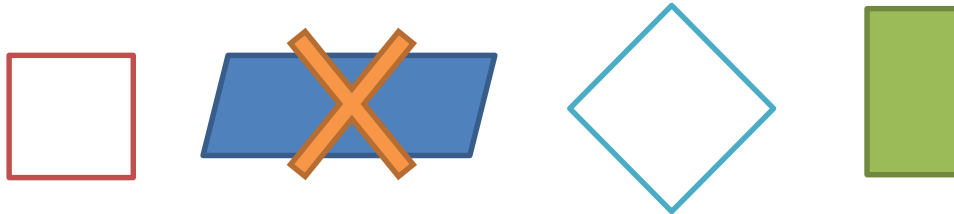

Look at the sides and corners of the shapes in each row.

a) Cross off the shape that does not have the same number of sides and corners and tell how it is different.

All shapes have 4 sides and 4 corners except the triangle. I marked it out because it has 3 sides and 3 corners.

b) Cross off the shape that does not have the same kind of corners as the other shapes and tell how the other shapes are alike.

I marked out the shape that does not have square corners. All other shapes have square corners.
