

Possible Solutions

- a) Draw a rectangle.

- b) Draw a different rectangle and explain how it is different than the first rectangle you drew.

This is a square and a square is a special rectangle. It has 4 square corners and 4 straight sides, but it has sides that are all equal.

- c) Draw a figure with 4 straight sides that is not a rectangle. Explain why it is not a rectangle.

It is not a rectangle because it does not have 4 square corners.
