

Possible Solution

Monica's grandpa told her she could have all the money in his pocket if she could tell him how much it was worth as shown below.

- a) How much money did Grandpa have in his pocket?

Grandpa has \$6.60 in his pocket,

- b) If Monica wanted to buy a book for \$6.75, will Grandpa's money be enough to buy it?

Grandpa has \$6.60 in his pocket. When Grandpa's money is subtracted from the cost of the book, \$6.75, Monica will need \$0.15 to have enough to buy the book.
