## Hint

When rounding 985,636,050 to the nearest thousand, find the closest value in the thousands to 985,636,050.

985,634,000   985,635,000   985,636,000   985,637,000   985,638,000

If the number is exactly halfway between two numbers in the thousands, the rule is to round to the greater number.
