

Hint

In the first quadrant, the x values and the y values are positive.

When graphing an ordered pair, start at the origin (O). Move parallel to the x -axis for the first number of the ordered pair. Move parallel to the y -axis for the second number of the ordered pair.

$$\left(7.5, 8\frac{1}{2}\right) \quad (3.5, 0)$$

$$(0, 5) \quad (5, 6)$$
