

Possible Solutions

Carly wanted to buy a new outfit for the 8th grade dance. She decides to use a gift card she got for her birthday. Did Carly make a good decision, why or why not?

Carly made a good decision because with a gift card, she does not pay interest. A gift card is also money that will not come out of her account, because someone else paid for the card. The problem with using a gift card is that Carly may want to buy something that costs more than the amount of the gift card.
